Whomever:

I am a student of 4th year of Industrial Chemical Engineering Degree in the mention of Materials, of the Polytechnic School of Engineering of Gijón, belonging to the University of Oviedo, and I would like to show my interest in being part of his company, carrying out work related to The competencies of the degree.

Currently I have four subjects and the GFR (work end of degree). My availability is absolute and immediate to enter to work. Good attitude and easy adaptation to the problems that arise for their resolution, experience acquired in the subject of internship in company (detailed in the CV), management of software varied from Office (Word, Excel, Fireworks,...) and design (AutoCAD, SolidWorks, Abaqus, Inventor, ...), a lot of desire to work in a group, to acquire new concepts and experiences in your company and to form part of a great team.

I attach my resume, but if you require more information, I would appreciate if you give me an interview to detail the information you need.

Best regards.

LUIS ALONSO MENDEZ
